

# Food Chain

by Steve Van Zandt

Plants are producers they're sun users, in the food chain.....chain, chain  
They make food from the sun and the food chain has begun, in the food chain.....chain, chain

Rabbit comes along and eats the plants down, in the food chain.....chain, chain  
But the plants they have more to feed that herbivore, in the food chain.....chain, chain

**Chorus: Predator and prey,  
producers and decay  
are in a food chain; chain, chain (2x)**

Coyote likes to eat a little rabbit meat, in the food chain.....chain, chain  
And it makes his day to eat some rabbit prey, in the food chain.....chain, chain

Coyote lifts his tail and scats on the trail, in the food chain.....chain, chain  
For the bugs that's a deal, scat's a gourmet meal, in the food chain.....chain, chain

**Chorus**

The scat will decompose and a new plant grows, in the food chain.....chain, chain  
So the food chain never ends, it just begins again, in the food chain.....chain, chain

You can see from this song how energy moves along, in the food chain.....chain, chain  
So eat your food my friend but think of where its been, in the food chain.....chain, chain

**Chorus**
